Price: ~~\$1,199.00~~ \$799.00

Short Description

Clean Factory has released the Rolex Daytona M116518LN-0048 replica watch. The replica watch is available with a gold dial and is equipped with a customized 4130 movement. It uses first-class craftsmanship to create high-end quality and demonstrates a highly professional replica level.

Description

Come on our exploration journey and learn more about this replica Rolex Daytona M116518ln-0048 gold watch. The dial of this watch is gold and paired with a dark gray rubber strap. The workmanship of this gold watch is very exquisite and noble and has a majestic, kingly style. Three black, eye-like sub-discs make the dial vivid and have practical functions. The rubber strap is comfortable and has a more casual and daily style.

There are more advantages as follows:

It has an impeccable enamel black dial with zero color difference. Each component of the carefully assembled three-layer dial is electroplated. The bezel is filled with precisely matched black oil to present the same matte effect as the original.

Powering the watch is a new customized Rolex-exclusive Cal. 4130 automatic winding movement, reflecting the thickness of the original. Every function is 100% realized, with

unprecedented customized KIF shock absorbers. The entire assembly follows the design of the genuine Cal. 4130 movement, and all three plates perfectly reflect the original from the chamfers to the sun pattern, maintaining a 1:1 respect for the original design. This not only surpasses all Daytona replicas on the market but is also the only replica that can rival the original.

The seam between the glass and the case is completely transparent, and no white edges can be seen. The curvature of the glass edge is consistent with the original, the height of the ceramic ring protruding from the glass is consistent with the original, the ceramic ring has a stronger rounded feel, the font is clean, and the edge of the ceramic ring is slightly rounded.

The luminous fill height is moderate and the brightness is good, the font is printed three-dimensionally, and the size of the small black circle is consistent with the original.

The replica Rolex Daytona watch of Clean Factory uses 904L material, 4130 movement, an AR strap, a clean dial/unique version, a clean ceramic ring, and polished factory hands, with a thickness of 12.2-12.3.

The strap or case fits seamlessly, the top of the strap/case is flush with the case, and the tail is slightly concave. The bottom of the strap or case is flush with the watch head, which is consistent with the original.

Specification

Features	
Brand	Rolex
Model	Daytona
Serial Number	M116518LN-0048
Gender	Man
Movement Type	Automatic Movement
Movement Model	Cal.34130 Automatic Movement
